ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: MEANS AND METHODS FOR TREATING A DISEASE WHICH IS ASSOCIATED WITH AN EXCESS TRANS-
PORT OF HYALURONAN ACROSS A LIPID BILAYER

(57) Abstract: The present invention relates to the use of at least one inhibitor of at least one ABC-transporter capable of transport-
ing hyaluronan across a lipid bilayer, such as verapamil or valspodar, for the preparation of a pharmaceutical composition for the
treatment of a disease which is associated with an excess transport of hyaluronan across a lipid bilayer, e.g. arthritis. Furthermore,
the present invention relates to a method for screening a compound which is suitable for the treatment of a disease which is associ-
ated with an excess transport of hyaluronan across a lipid bilayer, e.g. arthritis. The present invention also relates to a method for
screening a compound which reduces the transport of hyaluronan mediated by (an) ABC-transporter(s). Furthermore, the present
invention relates to a method for identifying a subject at risk for a disease which is associated with an excess transport of hyaluronan
across a lipid bilayer, e.g. arthritis as well as to a method of screening for a compound which is suitable for the treatment of a disease
which is associated with an excess transport of hyaluronan across a lipid bilayer, e.g. arthritis in a subject. In addition, the present
invention relates to a method of preventing, ameliorating and/or treating the symptoms of a disease which is associated with an excess
transport of hyaluronan across a lipid bilayer, e.g. arthritis in a subject.
